

Unrevealed target labels do not change the production decision state

170/170 states across 17 routes passed exact source-prior, menu, and prompt invariance; 2,725,689 unrevealed labels were permuted.

A Hidden-label intervention coverage

B Route-level audit

Real archived states; no generated values. Revealed outcomes and all public candidate attributes remain fixed.

A pass supports implementation non-interference, not transfer efficacy.
